

ASX RELEASE

31 October 2025

Speed Camera Contract Expansion in Queensland

Highlights

- Queensland Department of Transport and Main Roads has expanded its contract with Acusensus, doubling the number of trailer-based speed enforcement units
- New trailer units to be progressively deployed from November 2025 and throughout 2026, with each new unit to be utilised for an initial term of five years
- The incremental contract value associated with this contract variation is expected to total approximately \$16.6 million (excluding GST)

Acusensus Limited (ASX:ACE) (**Acusensus**), a technology company designing and developing artificial intelligence enabled road safety solutions, is pleased to announce an expansion to its existing Transportable Road Safety Camera Solution Agreement for speed enforcement services with the Queensland Department of Transport and Main Roads (**TMR**) for additional Harmony transportable solutions.

The transportable solutions are expected to be incrementally deployed with the first go-live date in November 2025 and further deployments to commence at various dates in 2026. Each solution will be deployed for a period of five years, unless TMR elects to extend the service timeframe under the two optional extensions of one year each.

The additional contract value is expected to total approximately \$16.6 million (excluding GST).

Acusensus Founder and Managing Director, Alexander Jannink, said:

“The Queensland government road safety camera program has been very effective at changing driver behaviours, and we’re pleased to be able to support the expansion of this life-saving program with Queensland’s Department of Transport and Main Roads.

“In the first seven months of this safety camera program using Acusensus transportable speed enforcement solutions, the number of drivers detected excessively speeding declined by an incredible 92%. Speed is a significant contributor to road casualties, and the expansion of this program will result in behaviour change across more of the road network, resulting in reduced road casualties.”

About Acusensus

Acusensus is a technology company that was founded in 2018 with a mission to design and develop artificial intelligence enabled road safety solutions. Collaborating with governments and commercial stakeholders to tackle distracted driving globally is Acusensus' first priority. Acusensus has pioneered intelligent solutions that provide anywhere, anytime digital evidence that can be used in conjunction with law enforcement to drive behavioural change and improve road safety. Acusensus technology is used to detect and provide prosecutable evidence of distracted driving (mobile phone use), seatbelt compliance, speeding, railway crossing compliance and the monitoring of vehicles of interest.

Leveraging AI and sensing expertise, Acusensus also provides technology that protects workers in live traffic environments. The Forsite by Acusensus road worker safety system integrates roadside sensors, connected wearables and real time analytics to give crews early warning of approaching vehicle risks, delivering the vital seconds needed to avoid harm while generating data that helps make worksites safer over time.

Acusensus listed on the Australian Securities Exchange in January 2023. Acusensus is headquartered in Melbourne, Australia, with offices also in Sydney, Brisbane, Perth, Auckland (New Zealand), Wellington (New Zealand), Christchurch (New Zealand), London (United Kingdom) and Las Vegas (United States).
