

ASX RELEASE

23 October 2026

Acusensus awarded new territory-wide traffic enforcement contract with the ACT

Highlights

- Acusensus has executed a new multi-year contract with the ACT Government for Traffic Enforcement Solutions with estimated total contract value of \$210m (excluding GST) should options to extend be exercised.
- The contract has an initial term of five years with a value of approximately \$63m (excluding GST), with two further five-year options.
- The contract includes the provision of transportable and fixed enforcement camera solutions across the territory for the detection of road safety offences.
- In addition to this contract with the ACT Government, Acusensus holds contracts for mobile phone enforcement, or mobile phone and seatbelt enforcement, in New South Wales, Queensland, South Australia and Western Australia, as well as speed enforcement programs in New South Wales, Queensland and Western Australia.

Acusensus Limited (ASX:ACE) (**Acusensus** or the **Company**), a technology company designing and developing artificial intelligence enabled road safety solutions, is pleased to announce that Acusensus Australia Pty Ltd, a wholly owned subsidiary of Acusensus, has signed a new Master Services Agreement and associated statements of work with the Australian Capital Territory, represented by the City and Environment Directorate (**ACT Government**), for the provision of specific traffic enforcement services for road safety offences.

Acusensus Founder and Managing Director, Alexander Jannink, said:

"Acusensus is delighted to significantly expand our existing relationship with the ACT Government. This landmark contract elevates our role in the ACT from a specialist detection provider to a comprehensive enforcement partner, introducing red-light, speed and average speed enforcement alongside our existing mobile phone and seatbelt offence detection systems."

Acusensus has had a long-standing relationship with the ACT Government, and we are proud to continue supporting its Vision Zero road safety objectives."

The new Master Services Agreement has an initial term of five years, with two options to extend for up to a further five years each.

Under the new contract, services include the provision, operation and maintenance of enforcement cameras as well as the provision of mid-office software solutions for the Territory to perform adjudication processes. The services will be delivered through a combination of software solutions, fixed-site enforcement solutions and transportable enforcement solutions, including:

- Multifunction trailer based enforcement for combinations of mobile phone, seatbelt, speed, average speed and vehicle of interest detection
- Trailer based speed enforcement
- Vehicle based speed enforcement
- Fixed-site red-light and speed cameras

The estimated contract value is \$63m (excluding GST) over the initial five-year term. The staged rollout of the replacement and expanded enforcement solutions is expected to commence in mid-2027.

With this contract, the ACT joins WA in utilising the full multifunction enforcement camera solutions offered by Acusensus. Acusensus also supplies mobile phone, seatbelt and/or speed enforcement solutions to New South Wales, Queensland, South Australia and Western Australia, in addition to its other international customers.

About Acusensus

Acusensus is a technology company that was founded in 2018 with a mission to design and develop artificial intelligence enabled road safety solutions. Collaborating with governments and commercial stakeholders to tackle distracted driving globally is Acusensus' first priority. Acusensus has pioneered intelligent solutions that provide anywhere, anytime digital evidence that can be used in conjunction with law enforcement to drive behavioural change and improve road safety. Acusensus technology is used to detect and provide prosecutable evidence of distracted driving (mobile phone use), seatbelt compliance, speeding, railway crossing compliance and the monitoring of vehicles of interest.

Leveraging AI and sensing expertise, Acusensus also provides technology that protects workers in live traffic environments. The Forsite by Acusensus road worker safety system integrates roadside sensors, connected wearables and real time analytics to give crews early warning of approaching vehicle risks, delivering the vital seconds needed to avoid harm while generating data that helps make worksites safer over time.

Acusensus listed on the Australian Securities Exchange in January 2023. Acusensus is headquartered in Melbourne, Australia, with offices in Sydney, Brisbane, Perth, Auckland (New Zealand), Christchurch (New Zealand), London (United Kingdom), Las Vegas Nevada (United States) and Hartford Connecticut (United States).
